Such factors may include, among others, actual results of current and proposed exploration activities; actual results of reclamation activities; future metal prices; accidents, labor disputes, adverse weather conditions, unanticipated geological formations and other risks of the mining industry; delays in obtaining governmental or regulatory approvals or financing or in the completion of exploration activities, as well as those factors discussed in the section entitled "Risks and Uncertainties" in this MD&A. MINERAL PROPERTIES

Winston Property

On January 31, 2025, the Company completed the Arrangement (Note 9), which included the Winston Property.

In October 2014, Sierra entered into an option agreement with Redline Minerals Inc. and its US subsidiaries (collectively, the "Optionors") to acquire up to an 80% interest in 102 unpatented lode mining claims in the Winston Property, in addition to the four Little Granite Gold Claims ("Little Granite") and Ivanhoe and Emporia claims ("Ivanhoe/Emporia"). In April 2017, Sierra entered into a definitive purchase agreement with the Optionors to acquire all of the Optionors' rights, title and interest in and to the Winston Property. The terms of this agreement closed on May 17, 2017, thereby extinguishing any remaining obligations to Redline Minerals Inc. and its US subsidiaries. Prior to closing, for total consideration of Little Granite and Ivanhoe/Emporia, Foremost paid the Optionors \$240,000 on behalf of Sierra and Foremost issued 88,000 common shares on behalf of Sierra (valued at \$341,500). Prior to January 31, 2025, Sierra staked additional claims, resulting in an aggregate total of 147 lode mining claims and 2 patented claims.

Ivanhoe/Emporia claims

In accordance with the terms and conditions of the underlying Ivanhoe/Emporia purchase agreement, the Optionors agreed to sell and convey Ivanhoe/Emporia Claims for the purchase price of US\$500,000 of which US\$361,375 remained owing to the Robert Howe Educational Trust ("RHET") upon closing on May 17, 2017. Sierra agreed to pay RHET a monthly royalty equal to the greater of the Minimum Monthly Royalty or Production Royalty determined in accordance with the following table:

Monthly Average Silver Price/Oz	Minimum Monthly Royalty	Production Royalty %
Less than \$5.00	\$125	3%
\$5.00 ~ \$6.99	\$250	4%
\$7.00 ~ \$8.99	\$500	5%
\$9.00 ~ \$10.99	\$1,000	6%
\$11.00 ~ \$14.99	\$1,500	7%

Management Discussions and Analysis

For the period from incorporation on July 19, 2024 to January 31, 2025

\$15 or greater	\$2,000	8%
-----------------	---------	----

All royalty payments made to RHET under the Minimum Monthly Royalty or Production Royalty of the agreement will be credited upon the purchase price. Sierra received an irrevocable waiver, effective September 30, 2024, whereby the accrued minimum monthly royalty payments outstanding as of January 31, 2025 of \$366,075 (US\$252,725) could not be enforced for repayment for a period of eighteen months provided that Sierra continues to make ongoing monthly payments of US\$1,400. Only the permanent production royalty of 2% of NSR on all ore mined on the Ivanhoe and Emporia lode claims, will remain as an encumbrance after the property has been purchased.

Little Granite Claims

In accordance with the terms and conditions of the underlying Little Granite purchase agreement, the Optionors agreed to sell and convey Little Granite for the purchase price of \$500,000 USD of which US\$434,000 remained owing to Silver Rose Corporation (“Silver Rose”) upon closing on May 17, 2017. During the year ended March 31, 2024, Sierra negotiated a final cash payment \$75,000 USD to exercise the option through the issuance of a non-interest-bearing promissory note. \$25,000 USD was repaid by Foremost during the year ended March 31, 2024. As at March 31, 2023, \$67,717 (\$50,000 USD) remained payable. The promissory note was due on October 15, 2023, and the remaining \$50,000 USD was paid by Foremost on behalf of Sierra during the year ended March 31, 2024. Prior to closing on the revised final cash payment, the Company had paid a total aggregate of \$111,000 USD to Silver Rose towards the purchase. The Little Granite Property was acquired for an aggregate cash consideration of \$186,000 USD, versus aggregate consideration of \$434,000 USD under the original terms. There are no encumbrances on the 4 unpatented Little Granite lode claims.

LIQUIDITY AND GOING CONCERN

The condensed interim condensed financial statements were prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. As at January 31, 2025, the Company had a working capital deficiency of \$208,941. In addition, the Company has not generated revenues from operations. The Company has financed its operations primarily through a promissory note. The Company continues to seek capital through various means including the issuance of equity and/or debt. These material uncertainties cast substantial doubt as to the ability of the Company to continue as a going concern. These condensed consolidated interim financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. Any such adjustments may be material.

In order to continue as a going concern and to meet its corporate objectives, the Company will require additional financing through debt or equity issuances or other available means. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

CASH FLOWS

The Company's operations were funded in full by a \$677,450 promissory note as detailed in the Arrangement discussion in this MD&A.

CAPITAL RESOURCES

During the period from incorporation on July 19, 2024 to March 28, 2025:

On January 31, 2025, as part of the Arrangement (Note 9), Rio Grande issued 25,827,348 shares valued at \$2,453,598, and 9,281,236 warrants valued at \$46,715 (Note 6) totaling \$2,500,313 as consideration.

FINANCIAL AND OTHER INSTRUMENTS

Capital and Financial Risk Management

Capital management.

The Company's objective when managing capital is to safeguard the entity's ability to continue as a going concern. In the management of capital, the Company monitors its adjusted capital which comprises all components of equity (i.e., capital stock and deficit).

The Company sets the amount of capital in proportion to risk. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue common shares. The Company is not exposed to any externally imposed capital requirements.

Fair value

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the

RIO GRANDE RESOURCES LTD.

Management Discussions and Analysis

For the period from incorporation on July 19, 2024 to January 31, 2025

relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 - Unadjusted quoted prices in active markets for identical assets and liabilities;

Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 - Inputs that are not based on observable market data.

The carrying value of royalty payable and income tax penalty payable approximate their fair value because of the short-term nature of these instruments.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. Financial instruments that potentially subject the Company to a significant concentration of credit risk consists primarily of royalty payable and income tax penalty payable.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at January 31, 2025, the Company had current liabilities of \$633,391. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms. The Company is exposed to liquidity risk and is dependent on obtaining loans or financings in order to continue as a going concern. Despite previous success in acquiring these loans, there is no guarantee of obtaining future loans.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

Interest rate risk

The Company has income tax penalties payable that accrues interest. The Company's liabilities do not have significant exposure to interest rate risk.

Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to income tax penalty payable and royalty payable. A 10% change in the USD/CAD foreign exchange rate would result in a \$53,684 foreign exchange gain or loss. The Company has not hedged its exposure to currency fluctuations.

Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Risks and Uncertainties

Mineral exploration is subject to a high degree of risk, which even a combination of experience, knowledge and careful evaluation may fail to overcome. These risks may be even greater in the Company's case given its formative stage of development.

Exploration activities are expensive and seldom result in the discovery of a commercially viable resource. There is no assurance that the Company's exploration will result in the discovery of an economically viable mineral deposit. The Company has generated losses to date and anticipates that it will require additional funds to further explore its properties. There is no assurance such additional funding will be available to the Company on commercially reasonable terms or at all. Additional equity financing may result in substantial dilution thereby reducing the marketability of the Company's shares. The Company's activities are subject to the risks normally encountered in the mining exploration business. The economics of exploring, developing and operating resource properties are affected by many factors including the cost of exploration and development operations, variations of the grade of any ore mined and the rate of resource extraction and fluctuations in the price of resources produced, government regulations relating to royalties, taxes and environmental protection and title defects. The Company's mineral resource properties have not been surveyed and may be subject to prior unregistered agreements, interests or land claims and title may be affected by undetected defects. In addition, the Company may become subject to liability for hazards against which it is not insured. The mining industry is highly competitive in all its phases and the Company competes with other mining companies, many with greater financial and technical resources, in the search for, and the acquisition of, mineral resource properties and in the marketing of minerals. Additional risks include the lack of an active market for the Company's securities and the present intention of the Company not to pay dividends. Certain of the Company's directors and officers also serve as directors or officers of other public and private resource companies, and to the extent that such other companies may participate in ventures in which the Company may participate, such directors and officers of the Company may have a conflict of interest. Finally, the Company has no history of earnings, and there is no assurance that any of its current or future mineral properties will generate earnings, operate profitably or provide a return on investment in the future. There is no assurance that the Company will be successful in achieving a return on shareholders' investment and the likelihood of success must be considered considering its early stage of operations. There is also no assurance that the conditions to the Arrangement will be met.

For a more detailed discussion of the risk factors affecting the Company and its exploration activities, please refer to Foremost filings on www.sedarplus.ca.
